

NETSOINS & THE DMP

Placing the patient **at the heart** of the healthcare system.

WHAT IS THE DMP ?

The **Dossier Médical Personnel** is a **secure electronic** health record that follows patients throughout their life-time.

It is designed to provide a variety of services allowing patients and authorised healthcare professionals to electronically **share health information** relevant to the coordination of patient care.

CONTRIBUTING TO QUALITY HEALTHCARE FOR ALL

In the face of today's great healthcare challenges, notably population ageing and the increase in chronic pathologies, the **Dossier Médical Personnel** is a **modern and efficient tool** that helps to improve healthcare coordination, quality and continuity for all, through:

 **INFORMATION TRACEABILITY**
(access to medical history is key for doctors to provide better patient care)

 **IMPROVED PATIENT/DOCTOR COMMUNICATION**

 **THE TRANSMISSION OF INFORMATION**
between healthcare professionals

NETSOINS IS DMP-COMPATIBLE

NETSoins contributes to improve services rendered to patients by facilitating **access to quality information** that remains consistent wherever one may be:

 **DOCUMENT TRANSMISSION AND MANAGEMENT**

 **SUMMARIES, REPORTS**

 **IMAGING**

 **LABORATORY ANALYSES**

 **ETC.**

+ OPTION
NETSOINS
& THE DMP

DMP STEPS

- ✓ **NETSoins** allows you to check if a health record already exists for a given resident.
- ✓ If a new record must be created, **NETSoins** can link the resident's Carte Vitale to their records and obtain resident consent.
- ✓ The software can also calculate **the National Health Identifier (INS-C)**.
- ✓ Once the DMP has been created, you have the option to:
 - upload various files to the DMP from your document storage system. Titles in the drop-down menu follow DMP standards.
 - transfer the Liaison Emergency File (DLU) from the "liaison file" section.

THE DMP PROCESS WITH NETSOINS
